GOAL

I want to start an IT-career in a successful company, where I can get real-world experience and develop skills in the field of software development, where I would be able to feel the importance of my work and work on interesting projects.

SKILLS

- Strong knowledge of HTML, CSS(including HTML5, CSS3), ready to create simple web pages
- Understanding Git
- Working and knowledge of JavaScript, and related libraries(JQuery)
- Working and knowledge with task runners (Gulp)
- Working with preprocessors (Sass)
- Working with responsive web design approach and mobile solutions
- Working with Adobe Photoshop(base)
- Ability to create simple MySQL-queries
- Understanding APIs services
- Checking the markup validity
- Excellent communication skills, ability to learn new software and processes quickly and efficiently

EDUCATION

Kiev College of Communication

Software development

Years: 2016 – 2020

EXPERIENCE

- <http://project2.second.mkortib.com.ua/> - This is an example of a corporate multi-page site with a feedback form.
- <http://landing.first.mkortib.com.ua/> - this is landing page with information about the advertised service.
- <http://mini.victorina.mkortib.com.ua/> - web-app called "**Do you remember geography**" is an application in which you can test your knowledge.
- Developed 10+ websites, using HTML5, CSS3(flexbox, grid), JQuery, AJAX.
- Working with JQuery plugins(Owl Carousel 2, mmenu, Magnific Popup, YTPlayer etc.)
- Using PHP(for feedback form).
- Also using Google Map API, Giphy API.

ADDITIONAL INFORMATION

English level: Pre-Intermediate

Interest: Now I'm going deeper into js, I'm starting to learn modern frameworks such as React.js, in the near future I want to learn also Back-end and move to fullstack developer.
